3 Complete these instructions with the words in the box.

connect disconnect internal motherboard partition plug push

It isn't difficult to add a new (17) internal drive to a desktop computer. First, make sure the computer is off and (18) disconnect it from the electricity socket. Then (19) push the drive into a spare space as far as it will go. Next, find the SATA cable that came with the drive and (20) plug one end of it into the SATA socket on the (21) motherboard and the other end into the drive. You'll also need to (22) connect a power cable. Then, when you switch on the computer, you just need to format the drive. You can also (23) partition it if you want to use different parts of it for different purposes.

4 Complete these sentences with *to*, *for*, *so* and *because*.

- 24 I back up my data for security.
- 25 I use open source software because it's free.
- 26 You can double click on the title bar to maximise the window.
- 27 I use a video camera so that I can show video to people.
- 28 You can use an external hard drive to back up your data.
- 29 Drag the folder icon to move it to a new drive.
- 30 I bought a webcam so that I can make video calls.
