

# Why code is so Important today?

Computers are everywhere. Do you wanna work agriculture? Do It's just all over. Today is 2020 - We are depend on technology: to communicate, to bank, to control manufactures and farms, to learn information, and nanoways how to read

Policy of the most of the big companies today is to find and hire as many talented engineers as they can find, cause nowadays there are too much, there are enough people who just train and have these skills today. To get these talented companies build the best offices, they try to build the best conditions and atmosphere, they spend a lot and not for empty. Companies are literally understand what is their business.

Having a knowledge of Code is very important because it turns mind on to what is possible. And if you know what is possible you are more likely to be sucessfull later wrong. The coding is training to thing pridectly abou
