Кафедра электронных вычислительных машин

Дисциплина: «Базы данны	oIX»
Лабораторная работа №	1
«Реализация SQL-запросов для создания с	хемы базы данных»
Выполнил: Студент группы 990541	Полховский А. Ф.
Проверил:	Куприянова Д. В.

Работа выполнялась с использованием СУБД PostgreSQL. Была создана база данных с названием «footballClub». Далее был написан скрипт для создания таблиц, установления ограничений и связей между таблицами:

```
CREATE TABLE sportsmen
     ID SERIAL CONSTRAINT sportsmen_Id PRIMARY KEY,
     fname CHARACTER VARYING(30) CONSTRAINT fname_nn NOT NULL,
     sname CHARACTER VARYING(30) CONSTRAINT sname nn NOT NULL,
     amplua CHARACTER VARYING(30) CONSTRAINT amplua_nn NOT NULL,
     birthday DATE CONSTRAINT birthday_nn NOT NULL,
     nationality CHARACTER VARYING(30) CONSTRAINT nationality_nn NOT NULL
);
CREATE TABLE individual_achievments
     ID SERIAL CONSTRAINT individual_achievments_id PRIMARY KEY,
     sportsmen_id INTEGER,
     aname CHARACTER VARYING(30) CONSTRAINT aname_nn NOT NULL,
     FOREIGN KEY (sportsmen_id) REFERENCES sportsmen (Id)
);
CREATE TABLE trainer
     ID SERIAL CONSTRAINT trainer_id PRIMARY KEY,
     fname CHARACTER VARYING(30) CONSTRAINT fname nn NOT NULL,
     sname CHARACTER VARYING(30) CONSTRAINT sname_nn NOT NULL,
     birthday DATE CONSTRAINT birthday nn NOT NULL,
     nationality CHARACTER VARYING(30) CONSTRAINT nationality nn NOT NULL,
     main_ahchievment CHARACTER VARYING(30) CONSTRAINT
main ahchievment nn NOT NULL
);
CREATE TABLE team
     ID SERIAL CONSTRAINT team id PRIMARY KEY,
     sportsmen_id INTEGER,
     trainer_id INTEGER,
     tname CHARACTER VARYING(30) CONSTRAINT tname nn NOT NULL,
     FOREIGN KEY (sportsmen id) REFERENCES sportsmen (Id),
     FOREIGN KEY (trainer_id) REFERENCES trainer (Id)
);
CREATE TABLE club
     ID SERIAL CONSTRAINT club_id PRIMARY KEY,
     team id INTEGER,
     cname CHARACTER VARYING(30) CONSTRAINT cname_nn NOT NULL,
     country CHARACTER VARYING(30) CONSTRAINT country_nn NOT NULL,
     FOREIGN KEY (team id) REFERENCES team (Id)
);
```

```
CREATE TABLE match_result
     ID SERIAL CONSTRAINT match_result_id PRIMARY KEY,
     team id INTEGER,
     competitor CHARACTER VARYING(30) CONSTRAINT competitor_nn NOT NULL,
     mresult CHARACTER VARYING CONSTRAINT mresult_nn NOT NULL,
     seson CHARACTER VARYING(30) CONSTRAINT seson_nn NOT NULL,
     league CHARACTER VARYING(30) CONSTRAINT league_nn NOT NULL,
     FOREIGN KEY (team Id) REFERENCES team (Id)
);
CREATE TABLE club_owner
     ID SERIAL CONSTRAINT club_owner_id PRIMARY KEY,
     club id INTEGER,
     fname CHARACTER VARYING(30) CONSTRAINT fname_nn NOT NULL,
     sname CHARACTER VARYING(30) CONSTRAINT sname nn NOT NULL,
     birthday DATE CONSTRAINT birthday_nn NOT NULL,
     nationality CHARACTER VARYING(30) CONSTRAINT nationality_nn NOT NULL,
     FOREIGN KEY (club Id) REFERENCES club (Id)
);
CREATE TABLE stadium
     ID SERIAL CONSTRAINT stadium id PRIMARY KEY,
     team_id INTEGER,
     sname CHARACTER VARYING(30) CONSTRAINT sname_nn NOT NULL,
     capacity INTEGER,
     foundation_date DATE CONSTRAINT foundation_date_nn NOT NULL,
     FOREIGN KEY (team Id) REFERENCES team (Id)
)
```

После применения скрипта средствами СУБД была построена база данных, которая представлена ниже.

```
Tables (9)

Tables (9)

Club

Club_owner

individual_achievments

match_result

schedule

schedule

sportsmen

team

trainer
```

Затем заполним БД данными.

INSERT INTO individual_achievments (sportsmen_id, aname)
